Allowable Subject Matter

1. Claims 10-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements:

a display screen having an area with a marginal area around it that users can make a selection by moving an actuating element rotatable about a longitudinal axis (this actuating element has an initial position to perform an additional movement having 2 additional degrees of freedom) via the additional movement of the actuating element, which enables a field in the marginal area associated with a point of the menu structure to be selected and a subordinate field of the menu structure associated with that field being selected in the central region of the display screen when the actuating element makes a rotation about the longitudinal axis and movement in the direction of the longitudinal axis as recited in claim 17.

Although Nason et al. and Macor teach many of the claimed matters, Nason et al. and Macor fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
